

Oxford Dictionaries API

Provides:

This API provides definitions, word lists, synonyms, and other types of linguistic data in multiple languages.

Key Provisioning:

Pain factor (*0=ezipz...5=nightmare*): 

- Click on the button on the home page that says '**get your API key here**' and fill out the registration form for an account. A link to your account will be emailed to you; follow the link and click '**credentials**' to view your key(s).

Quotas:

- 3k requests per month for free account
- Max of 5 keys for free account

The Good:

- Very detailed and straightforward documentation
- A wide variety of information available
- Lots of interactive examples, demos, and code snippets to help you get started

The Bad:

- Very limited number of requests for each word

The Ugly:

- Difficult to access what you need in the dictionary/list dump, unorganized
